

Jonathan Håkansson

Aspiring Developer / Junior .NET Developer

Pärlgatan 4, Märsta 19530 • (+46) 070-09 196 69 • jonathanfromsweden@gmail.com • hoffanz.github.io

Profile

Junior .NET developer with hands-on experience in backend development using C# and ASP.NET Core. During my internship at Digital Engine, I modernized legacy code from Visual Basic to C#, built a calendar booking system from scratch, and worked with MongoDB and Azure configuration. I bring a background as a professional truck driver – which has given me a strong ability to take ownership, meet deadlines, and deliver without requiring supervision.

Skills

- C#
- .NET / ASP.NET Core (Web API)
- REST APIs
- Git / Fork (branching, pull requests)
- Automated testing (xUnit, basic Moq)
- HTML, CSS, JavaScript (basic)
- Azure DevOps (CI/CD, academic projects) / Microsoft Azure
- MVC (basic)
- SignalR (real-time communication)
- JWT (authentication & authorization)
- MongoDB, JSON configurations
- SQL Server / Entity Framework Core
- Microsoft Exchange (integration)

AI Tools

Active user of AI-assisted development tools (GitHub Copilot, ChatGPT, Claude) in day-to-day coding – including via terminal. Interested in deepening my knowledge of LLM integrations and AI agents.

Professional Strengths

- Communication and teamwork
- Responsibility and reliability
- Structured work approach
- Customer-focus mindset

Experience

Internship – Software Developer | Digital Engine

Nov 2025 – Apr 2026

- Worked in Digital Engine's own product Office Assistant – modernized legacy code from Visual Basic to C# and extended existing functionality.
- Built a calendar booking system from scratch (solo) with date-based booking logic and MongoDB – an advancement of a simpler VB solution that previously only handled basic bookings.
- Worked with Azure App Registration, client secrets, and permission management. Studied the differences between RBAC and Delegated permissions in the Microsoft identity platform.
- Integrated Office Assistant with Microsoft Exchange.
- Wrote automated tests in xUnit, worked with JSON configurations, documentation, and pair programming.

Tipper Truck Driver (Drawbar Trailer) | Hellman Åkeri AB

Jun 2022 – Jun 2024

- Transported materials to construction projects and private customers with a strong focus on safety, quality, and customer service.

Tipper Truck Driver (Rock Trailer) | Özpa Åkeri AB

Oct 2019 – Jun 2022

- Worked primarily on the Stockholm Bypass Project, transporting excavation materials to large-scale infrastructure projects.

Tipper Truck Driver | Norrorts Åkeri

Sep 2018 – May 2019

- Transported excavation materials to construction projects and private customers.

Projects

ChatApp with SignalR

github.com/Hoffanz/ChatApp

Real-time chat application built with ASP.NET Core and SignalR. Includes JWT authentication and automated tests in xUnit.

Microservice Invoice Service

github.com/Hoffanz/InvoiceServiceVentixe

Group project with a backend focus. Microservice handling invoice logic and integration with external APIs.

Languages

- Swedish – native
- English – fluent in speech and writing

Education

Nackademin – Solna

Aug 2024 – May 2026

Vocational higher education program focused on the .NET platform, including C#, DevOps, frontend development, and database technologies.

NTI-skolan – Stockholm/Distance

Oct 2023 – May 2024

Supplementary studies in mathematics, Swedish, and Programming 1 (C#) in preparation for higher education.

Upplands-Bro gymnasiet – Upplands-Bro

Aug 2015 – Jun 2018

Vocational program – professional truck driver.

Mälargymnasiet – Järfälla

Aug 2012 – May 2015

Social science program with behavioral studies orientation.
